

Press Release

Hoxhunt and Cyber Intelligence House announce partnership to connect Cyber Threat Exposure with Employee Cyber Awareness

HELSINKI, FINLAND and LONDON, U.K., November 11, 2021 – Hoxhunt, a premium enterprise cybersecurity awareness training platform, and Cyber Intelligence House, a leading provider of cyber intelligence, today announced a first-of-its-kind partnership designed to equip organizations with unprecedented protection from email attacks leveraging advanced insight across their dark-web-to-employee-inbox lifecycle.

Hoxhunt's CEO, Mika Aalto stated:

“This partnership with Cyber Intelligence House will open a whole new category of proactive cybersecurity awareness. Their industry-leading Cyber Exposure Platform adds a superior breadth and depth of intelligence from the Darkweb, Deep web and cyberspace forums and marketplaces to our dynamic awareness platform, typically 16 times more data than other solutions. By connecting threat intelligence with awareness, we can transform insight into foresight. Just imagine knowing an attack is likely coming and being able to train your employees with simulations of the actual phishing templates hackers purchased for their attack”.

Cyber Intelligence House's CEO, Mikko Niemela adds:

“We are very excited to be partnering with Hoxhunt. Their best-in-class Cyber Awareness and Training platform allows organisations to adapt and defend against the ever rising volume of cyber threats that our platform identifies”.

About Hoxhunt:

Hoxhunt is a People-First Cybersecurity Platform that protects organizations and their employees from the risk of cyber attacks. Hoxhunt's cognitive automation maps individually adaptive training curriculum to each employee's skill level for optimal engagement. Hoxhunt empowers individuals with the tools and confidence to recognize and respond to attacks dynamically over time.

Hoxhunt enables security teams with real-time visibility into threats so they can react fast and limit their spread. The entire platform is autonomous, freeing up considerable time for security teams to focus on what matters.
